Importance: High

Categories: Filed by Newforma

So good that I keep emails. This one has a pretty good indication of what the problem was and why Dave was upset back then. Not sure why he is bringing it back out to bludgeon us now, but he may have at least some ground to stand on. The thing is that the IA sampling report was still pending at that time. I think this was after Bruce left and before I got more involved in Grenada or at least while I was trying to stay out of being involved in Grenada.

Ihsan,

This is what you were talking about today regarding not having anyone to really manage Grenada. I am sure that I did not read the permit and I would guess that you did not either.

I am trying to get the file from Dave.

Thanks,

JP

Ihsan:

Below is a response from me to USEPA stating B&C had no comments to the draft permit. I suggest you review page 45 of 69 related to indoor air. How was this missed? Why would I agree to this considering there is no resolution to the indoor air monitoring report. A suggested change, if it is not too late, is to revise the statement "...as long as the main plant building is occupied." To read as "...as long as the Buffing Sludge Basement is occupied." If we satisfy the argument that the basement is a confined space and will be controlled as such, then it is not occupied by definition.

I have sent you the permit and letter from USEPA through our Large File Exchange site (wait for the 2nd email before trying to download). Please get back to me ASAP.

Subject: Grenada HSWA Permit (DRAFT) and Site Visit

Meredith:

I discussed the Draft HSWA Permit you provided earlier with Ihsan Al-Fayyomi of Brown and Caldwell. ArvinMeritor has no comments or changes to the draft document you provided. Thank you for the opportunity to review a draft of the HSWA permit.

In terms of your visit to Grenada, MS next week, please be aware that Don Williams (ICE Industries) is only available to meet with you and others in your party April 19 – 21, 2010. Mr. Williams is traveling and unavailable April 22 – 26, 2010. In discussions with Don, he is unable to reschedule his commitment for those dates noted. Don is the best representative to guide you and answer questions related to the existing manufacturing facility. I hope this meets your schedule for visiting the site.

Erik McPeek (Brown and Caldwell) is currently onsite and will be present at the site all next week. Erik is available to meet and discuss with you and others the sludge lagoon closure project, the Permeable Reactive Barrier, and the closed 16th Section Landfill. He is somewhat familiar with the Moose Lodge Road property but not with the remediation project. The Moose Lodge Road remediation project is managed by John McInnes of Stantec.

Please let all parties on this email know if the proposed accommodations meet your needs for next week's visit. Your proposed itinerary would be helpful to everyone. As I indicated to you yesterday, I am unable to travel to Grenada, MS next week.

Subject: Re: Grenada Sludge Lagoon Project Schedule

David,

I will be in the Grenada. MS area next week for work on another project. I would like to combine the trip with a site visit to Granada Manufacturing, if possible. Can you provide me with an update of the sludge lagoon schedule? I am also coordinating with Ms. Sharon Matthews, EPA Geologist, who may be able to attend as well.

With regards to the permit renewal, please let me know if you have had a chance to look at the draft Preliminary Draft Permit Renewal forwarded to you last month. It is still undergoing an internal review by our legal staff, but I am happy to discuss any questions you may have.

Thanks very much.
